

**Debbi Fields**

Debbi was diagnosed at 36 with hydrocephalus (Aqueductal Stenosis). Her doctor concluded after asking her and her family several questions that Debbi was born with a 'mild case of hydrocephalus and it has and it waited until now to rear its ugly head.' As she often states 'it sure made sense out of her childhood.' To date, she has had 12 revisions – including 5 in one month.

Since her diagnosis, she has been extremely interested in hydrocephalus and especially other patients – she has taught them and has been taught by them.

Debbi has a Bachelor's Degree in Sociology with a concentration in medical which she received from University of California – Long Beach.

Debbi was also a claims adjuster for moving companies for 22 years.

You can contact Debbi through the foundation's website, her Facebook account, the foundation's Facebook account... and of course, by phone.
